DevOps Engineer

Career Objective:

Having 3 years of experience in DevOps environment and to work in a challenging environment gives me a chance to polish my technical and interpersonal skills to achieve the organizational goals that in turn fetch me a successful career.

Professional Summary:

- Experience in setting up CI/CD pipelines using **Azure pipelines**.
- Experience in working with version control system like **GIT, Azure Repos**
- Implemented & maintained the branching, merging and build/release strategies utilizing Azure repos.
- Hands on experience on **Shell** Scripting for task Automation and to schedule tasks.
- Working Experience in **Azure repos, Azure Pipelines, Docker, Kubernetes, Maven,NPM, Shell Scripting**.
- Having knowledge on **SQL**.
- Having experience in **Terraform**.
- Exposure to **SDLC** activities like **Agile** methodology.
- Good Interpersonal Skills, Team-working attitude, takes initiatives and is very proactive in solving problems and providing best solutions.
- Strong communication, collaboration with proficiency at grasping new technical concepts quickly & utilizing the same in a productive manner.
- Having hands on **AZURE** cloud services (Resource groups, Vnet,subnets, ARM templates, Storage accounts).
- Having experience in setting up CI/CD with **Jenkins, Azure Pipelines**.
- Having knowledge on **AWS** cloud services (Ec2, S3, VPC).

Education:

B.Tech from Khammam Institute Of Technology& Science college affiliated with **JNTU-H University**.

Work Experience:

- Working as DevOps Engineer in PNQ Technologies Ltd from June-2024 to till to date.
- Worked as Consultant DevOps Engineer in Jio Platform Ltd from Aug-2022 to Feb 2024.

Payroll companies: VHR solutions pvt ltd & e Soft technologies pvt ltd..

Technical Skills:

Cloud Platform	Microsoft Azure
SCM	GitHub, Azure Repos
Build Tools	Maven, Ant, Npm, Gradle
DevSecOps	HpFortify, BlackDuck,Trend Micro

CI/CD Tools	VSTS (Azure Pipeline), Jenkins
Operating Systems	Windows, Linux
Scripting	PowerShell, YAML
Bug & Issue Tracking Tools	Azure work items, Jira, Service Now
Collaboration Tools	Confluence, Microsoft Teams
Monitoring Tools	Datadog, OpsGiene, Splunk

Professional Certifications:

- Achieved AZ-900 -Microsoft Azure Fundamentals from Microsoft
- Achieved AZ-104 - Microsoft Azure Administrator from Microsoft

Professional Experience:

Project: DPE & View Point

Role: DevOps Engineer

Project Description: Viewpoint is an online resource/tool for financial professionals worldwide. It consolidates all the financial reports into one place. It covers the financial reporting under IFRS, US GAAP and national GAAP.

Tools Used: - AEM, AZURE, Maven, Git, Jenkins, Datadog, Splunk.

Roles and Responsibilities:

- Managed and configured Adobe Experience Manager (AEM) for efficient content delivery and system integration.
- Maintained Git branches, handling version control, merging changes, and ensuring code consistency across development and production environments.
- Performed manual deployments across QA, Stage, and Production environments, ensuring smooth transitions and minimal downtime.
- Monitored and optimized Jenkins jobs, addressing build issues and improving pipeline performance to support the dynamic needs of financial content management.
- Designed and maintained CI/CD pipelines using Azure Pipelines, automating build, test and deployment processes to ensure consistent and efficient software delivery.
- Monitored system performance and alerts using OpsGenie and Data dog, identifying root causes of issues and implementing timely solutions.
- Utilized Splunk's search and analysis capabilities to identify patterns and root causes of performance issues, aiding in the resolution of complex problems within the financial reporting system.
- Conducted system restarts and reboots as needed to resolve operational issues and maintain system stability.
- Upgraded Tomcat servers to the latest versions, enhancing performance and security.
- Executed ingestion activities, managing data flow and integration processes to ensure accurate and up-to-date financial content.
- Oversaw content synchronization and syndication activities, ensuring consistent and accurate.

Project : Jio Platforms Ltd, Bangalore

Role : DevOps Engineer

Roles and Responsibilities:

- End to end pipeline automation for build, test, deploy with various technologies like Java-Maven, Gradle, NPM, Docker, Kubernetes for Azure DevOPs Server 2019.
- Troubleshooting the error and providing the proper resolution for the Developers.
- Working on BAU and onboarding for the different tech stacks (Maven,Gradle,NPM,Sbt,python).
- Working on Templatizing the classic pipelines for the Build (Continuous Integration).

- Working on Jfrog Migration from Nexus for the existing build and release pipelines with jfrog artifactory.
- Designed and Deployed microservices in Docker containers with Kubernetes tool
- Integrating the SonarQube, Trend Micro, Hp Fortify, BlackDuck tools for the build pipeline for Security.
- Have implemented central build templates using yml in azure- devops pipelines.
- Implemented On Demand agents to spinup azure agents dynamically.
- Having knowledge on db deployment automation using Liquibase.

Declaration:

I, hereby declare that all the details furnished above are true to the best of my knowledge.
