Professional Summary

DevOps Engineer with 2.8+ years of hands-on experience designing, implementing, and automating CI/CD pipelines, infrastructure-as-code, and containerized microservices on Azure and AWS. Proven track record of reducing deployment times by up to 60%, enhancing system reliability through monitoring and scripting, and collaborating in Agile environments to accelerate software delivery.

Work Experience

DevOps Engineer

PNQ Technologies Ltd, Pune (Onsite) | Jun 2024 – Present

- Managed and configured Adobe Experience Manager (AEM) for efficient content delivery and system integration..
- Performed manual deployments across QA, Stage, and Production environments, ensuring smooth transitions and minimal downtime..
- Designed and maintained CI/CD pipelines using **Azure Pipelines**, automating build, test and deployment processes to ensure consistent and efficient software delivery, cutting release time by 50%.
- Monitored system performance and alerts using **Datadog** and **OpsGiene**, identifying root causes of issues and implementing timely solutions.
- Utilized **Splunk** search and analysis capabilities to identify patterns and root causes of performance issues, aiding in the resolution of complex problems within the financial reporting system, improving incident detection time by 35%.
- Managed version control strategies in Azure Repos, implemented branching and merge policies to support trunk-based development.
- Conducted system restarts and reboots as needed to resolve operational issues and maintain system stability.
- Upgraded Tomcat servers to the latest versions, enhancing performance and security.
- Executed ingestion activities, managing data flow and integration processes to ensure accurate and up-to-date financial content.
- Oversaw content synchronization and syndication activities, ensuring consistent and accurate.

Consultant DevOps Engineer

Jio Platforms Ltd, Bangalore (via VHR Solutions & eSoft Tech) | Aug 2022 – Feb 2024

- Automated end-to-end build, test, and deployment pipelines using **Jenkins** and **Azure DevOps Server 2019** for Java-Maven, Gradle, and NPM projects.
- Migrated 200+ artifacts from Nexus to **JFrog Artifactory**, updating pipelines with zero downtime.
- Working on BAU and onboarding for the different tech stacks (Maven,Gradle,NPM,Sbt,python).
- Containerized microservices with **Docker** and **Kubernetes (AKS)**, implementing rolling updates that cut downtime to <1 minute.
- Developed YAML-based build templates and **on-demand** Azure agents, reducing pipeline maintenance effort by 30%.
- Integrated security scanning tools (**SonarQube**, Fortify, Black Duck, Trend Micro) into CI, catching 95% of high-severity issues before release.
- Automated database change management with **Liquibase**, enabling consistent schema migrations across environments.

Education

Khammam Institute of Technology & Science, Khammam, Telangana

Bachelor of Technology in Mechanical Engineering: 72.5%

Skills

Cloud & Infrastructure: Azure (Resource Groups, VNETs, ARM Templates, Storage Accounts), AWS (EC2, S3, VPC), Terraform

CI/CD & Automation: Azure Pipelines, Jenkins, YAML Templating, Shell Scripting, PowerShell, Maven, NPM, Gradle

Containers & Orchestration: Docker, Kubernetes (AKS)

Version Control & Collaboration: Git, Azure Repos

Ticketing Collaboration tools: Jira, Confluence, Microsoft Teams

Monitoring & Logging: Datadog, Splunk, OpsGenie

DevSecOps: SonarQube, HP Fortify, Black Duck, Trend Micro

Databases & Scripting: SQL (MySQL, PostgreSQL), Shell, YAML

Certifications

- **AZ-104:** Microsoft Azure Administrator
- **AZ-900:** Microsoft Azure Fundamentals
